

VOLKSWAGEN

January 10, 2010

Darryl,

Hope things are going well and happy new year! I wanted to let you know how happy we are with the VAD Pro-901, the technicians here love them, not only because they're small and smart, they also increase productivity in the shop and give us a great return on our investment! What is most valuable about the VAD Pro-901, it's a bi directional scan tool and it has measuring value blocks, you can also turn off factory running mode which helps us tremendously! Another good thing about this tool is that it comes with great customer service, we get people like darryl that are willing to help us when we get in a bind. All in all, time is money and this scan tool saves us time! Thanks for all your help over the years and if other dealers are smart they will buy the VAD Pro-901.

Sincerely,

John Craven
